

Installation Instructions for 100819 & 110819 Adjustable Dual Feed Line for Holley Carburetors

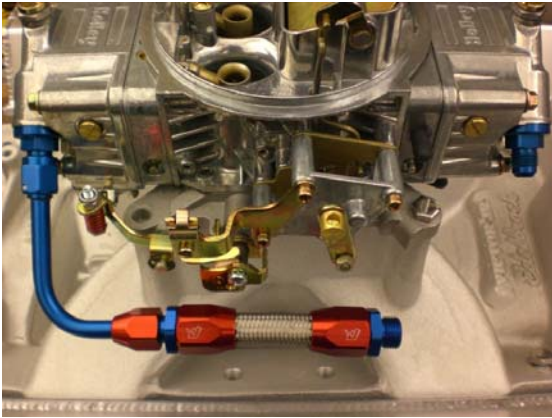

Installation Instructions:

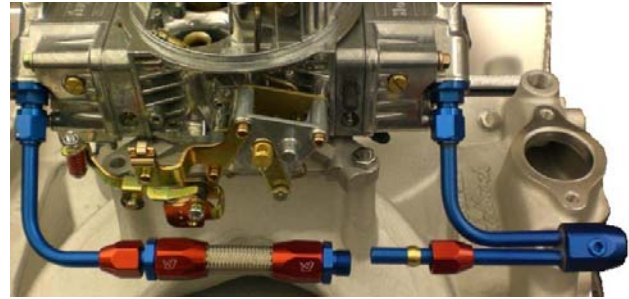

1. Install carburetor adapter fittings onto float bowls.

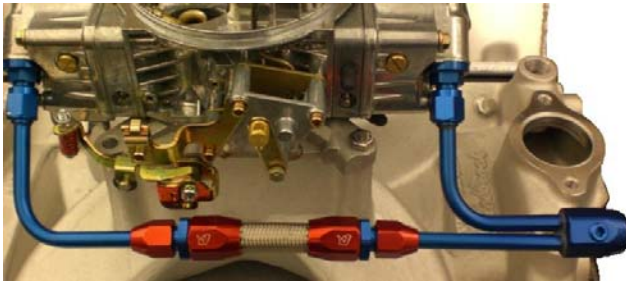

2. Install the rear feed line into the rear float bowl. Slide one compression nut and one compression sleeve onto the feed line.

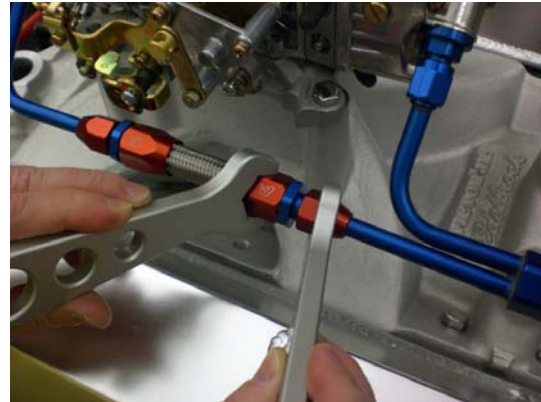

3. Slide the flex connection assembly over rear feed line and snug up on tube nut. **DO NOT** tighten tube nut.

4. Install front feed line onto front float bowl. Slide one compression nut and one compression sleeve onto the feed line.

5. Slide the flex connection assembly over front feed line and snug up on tube nut. **DO NOT** tighten tube nut. Center flex connection assembly between front and rear feed lines.

6. Using a wrench to secure the flex connection assembly from turning (use **CAUTION** here so that the flex connection assembly does not slide) tighten the tube nut. Follow the same procedure for the rear feed line.
